Study Assignment for the «Weizacker» Site, Luterbach

2026 | 1. Rang

Four buildings, 111 apartments, and an economical hybrid timber structural system: For the winning “Weizacker” project in Luterbach, Timbatec contributed its material-neutral structural design approach and specialized expertise in timber construction as early as the feasibility study phase.

Extension of apartment blocks at Neudorfstr. 32–60, Wädenswil

2026 | 1st place

As part of the Halter AG team, we were able to contribute our expertise – alongside Hotz Partner AG SIA, Wädenswil/Zurich – in the areas of structural engineering for the timber-framed extensions, as well as in building physics, sustainability, SNBS PreCheck and fire safety for the entire site.

Extension to the Höchweid Retirement Home, Ebikon

2025 | 1st place

The Höchweid Care Home is being modernised: an innovative new timber-frame building and a refurbishment are creating additional capacity and optimising operations. Thanks to a high degree of prefabrication in the timber construction, work is being carried out with minimal noise to allow the care home to remain open throughout.

Wolfacker School Building, Düdingen

2025 | 1st place

The new Wolfacker ‘Esplanade’ school building combines schooling, childcare and leisure activities within a flexible timber structure featuring spacious learning environments, a high quality of stay and sustainable construction.

School facility, Romont

2025 | Finalist

Deillon delley architectes have won the competition for the construction of a school, a double hall and a gymnasium in Romont. The project «Silva» by Atelierpulver Architectes in collaboration with Timbatec is among the finalists.

Development Kanaltal and Housing Grillparzerstraße, St. Veit

2024 | 2nd place

Timbatec was pleased to support TKP workshop Architekten in the competition for the Kanaltal estate development in St. Veit. We warmly congratulate Milla Koivulehto and Josef Steckermeier on their second place and on this compelling proposal for the further development of the neighbourhood.

School complex Gemeindewiesen, Neuhausen

2024 | 1st place

The extension to the school complex combines architecture, landscape and sustainable timber-concrete construction to form a forward-looking overall concept. Timbatec was involved in the project right from the competition phase and, with its expertise in timber construction, made a significant contribution to its development.

Modernisation Outdoor swimming pool area, Muri AG

2024 | 1st place

The planning team comprising Mireya Heredero Architect, Zurich; Balliana Schubert Landscape Architects AG, Zurich; and Timbatec Timber Construction Engineers Switzerland AG, Zurich, has been awarded the design brief for the further development of Badi Muri AG.

Du Lac Residential Development, St. Moritz

2024 | 1st place

Timbatec brings its expertise to a residential development concept in the Engadin. BGP, Mierta and Kurt Lazzarini Architects, together with Timbatec Timber Construction Engineers Switzerland AG, have won the designer selection process for the Du Lac residential building in St. Moritz.

New Children's and Community Centre, Pyhra

2023 | Honourable Mention

Timbatec supported the architect, DI Christiane Laimer, with her competition entry and is delighted to have received the honourable mention in 4th place

Boostocksteg Bridge, Spreitenbach

2023 | 1st place

Spreitenbach is revitalising its town centre: a new timber bridge for non-motorised traffic connects the village centre with the shopping centre. Together with a new park, this will create a sustainable, green oasis for relaxation and socialising.

Luberzen School Complex, Schöneggstrasse, Dietikon

2023 | 1st place

The extension of the Luberzen School Complex in Dietikon combines new replacement buildings and extensions to the existing structure using a mix of timber and solid construction methods – ensuring a sustainable, functional and disruption-free expansion of the school facilities.

Kindergarten Maria Gugging, Klosterneuburg

2023 | Anerkennung

For the new construction of the Maria Gugging Kindergarten, an EU-wide, open, single-stage design-build competition was announced, followed by a negotiated procedure for the award of general planning services. Timbatec supported Steinkogler Aigner Architekten ZT GmbH.

Eschenberg Forestry Depot, Winterthur

2022 | 1st place

The refurbishment of the Eschenberg Forestry Depot combines optimised operational processes with sustainable timber construction. Striking round-timber halls enable a high level of in-house production within the forestry operation and allow the forest to be reflected in the built environment.

Schule Wiesental, Baar

2019 | 1st place

The new Wiesental school complex serves as a unifying, public link between the town and the River Lorze. Innovative construction methods ensure optimum accessibility, flexibility of use and quality.
